READ THIS FOR SAFE AND EFFECTIVE USE OF YOUR MEDICINE
PATIENT MEDICATION INFORMATION

Pr UPTRAVI®
Selexipag (film-coated) tablets

Read this carefully before you start taking UPTRAVI® and each time you get a refill. This leaflet is a summary and will not tell you everything about this drug. Talk to your healthcare professional about your medical condition and treatment and ask if there is any new information about UPTRAVI®. Tell your doctor if you experience side effects, as your doctor may recommend that you change your UPTRAVI® dose. Tell your doctor if you are taking other medications as your doctor may recommend that you take UPTRAVI® only once daily.

What is UPTRAVI® used for?
UPTRAVI® is used for the long-term treatment of pulmonary arterial hypertension (PAH) in adults. It can be used on its own or with other medicines for PAH. PAH is high blood pressure in the blood vessels that carry blood from the heart to the lungs (the pulmonary arteries).

How does UPTRAVI® work?
UPTRAVI® widens the arteries that carry blood from the heart to the lung and reduces their hardening. This makes it easier for the heart to pump blood through the pulmonary arteries.

What are the ingredients in UPTRAVI®?
Medicinal ingredients: Selexipag.

Non-medicinal ingredients:

Do not use UPTRAVI® if:
If you are allergic to selexipag or any of the other ingredients of this medicine.
If you are being treated with strong inhibitors of CYP2C8 (e.g., gemfibrozil).

To help avoid side effects and ensure proper use, talk to your healthcare professional before you take UPTRAVI®. Talk about any health conditions or problems you may have, including if you:
- have low blood pressure
- have liver problems
- have kidney problems or are on dialysis
- have narrowing of the pulmonary veins, a condition called pulmonary veno-occlusive disease or PVOD
- have overactive thyroid gland
- are pregnant or plan to become pregnant
- are breastfeeding or plan to breastfeed
- have any other medical conditions

Driving and using machines
UPTRAVID® can cause side effects such as headaches and low blood pressure. Before driving or using machines, make sure you know how you feel while taking UPTRAVID®.

Tell your healthcare professional about all the medicines you take, including any drugs, vitamins, minerals, natural supplements or alternative medicines.

Taking other medicines may affect how UPTRAVID® works.

Talk to your PAH doctor or nurse if you are taking any of the following medicines:
- Gemfibrozil (used to lower the level of fats [lipids] in the blood)
- Valproic acid (used to treat epilepsy)
- Rifampicin, rifapentine (antibiotic used to treat infections)
- Fluconazole (antifungal used to treat infection by fungi)
- Clopidogrel (medicine used to inhibit blood clots)
- Deferasirox (medicine used to remove excess iron from the body)
- Teriflunomide (medicine used to treat relapsing-remitting multiple sclerosis)

Tell your doctor if you are taking, have recently taken, or might take any other medicines.

How to take UPTRAVID®:
- UPTRAVID® should only be prescribed by a doctor experienced in the treatment of pulmonary arterial hypertension.
- Always take UPTRAVID® exactly as your doctor has told you.
- Check with your doctor if you are not sure or have any questions.
- Take UPTRAVID® in the morning and in the evening, either with or without meals.
- You might tolerate the medicine better when you take it with meals.
- Swallow the tablets whole with a glass of water.
- Do not split, crush or chew the tablets.

Finding the right dose for you
- At the start of treatment, you will take the lowest dose. This is one 200 microgram tablet in the morning and another tablet in the evening.
- As instructed by your doctor, you will gradually increase your dose. This is called titration. It lets your body adjust to the new medicine.
- The goal of titration is to reach the most appropriate dose to treat you; this will be the highest dose you can tolerate.
- During titration, you may experience side effects such as headache, jaw pain, aching joints, muscle pain or a general feeling of being in pain, diarrhoea, feeling sick to your stomach or throwing up, stomach ache or reddening of the face.
- Tell your doctor if you experience side effects, as your doctor may recommend that you change your UPTRAVID® dose.
- Tell your doctor if you are taking other medications as your doctor may recommend that you take UPTRAVID® only once daily.
- If any of these side effects are difficult for you to tolerate, talk to your doctor about how to manage or treat them. There are treatments available that can help relieve the side
effects. **Do not stop taking UPTRAVI® unless your doctor tells you to.**

**Usual dose:**
The highest dose that you can tolerate during titration will become your maintenance dose. Your maintenance dose is the dose you should continue to take on a regular basis, in the morning and in the evening.

Every patient with PAH is different. Not everyone will end up on the same maintenance dose. Your maintenance dose will be between 200 micrograms and 1600 micrograms in the morning and in the evening. What is important is that you reach the dose that is most appropriate to treat you.

After taking the same dose for a long time, you may experience side effects that you cannot tolerate or that have an effect on your normal daily activities. If this happens, contact your doctor. Your doctor may adjust your maintenance dose as needed.

**Overdose:**

If you think you have taken too much UPTRAVI®, contact your healthcare professional, hospital emergency department or regional Poison Control Centre immediately, even if there are no symptoms.

**Missed Dose:**
- If you forget to take UPTRAVI®, take a dose as soon as you remember. Continue to take your next dose at the usual time.
- If it is nearly time for your next dose (within 6 hours before you would normally take it), skip the missed dose. Continue to take your next dose at the usual time.
- Do not take a double dose to make up for a forgotten tablet.

**If you stop taking UPTRAVI®**
- Keep taking UPTRAVI® unless your doctor tells you to stop.
- **Contact your doctor right away if you miss doses for more than 3 days in a row.**
- Your doctor may decide to restart your treatment at a lower dose to avoid side effects. Your dose may be gradually increased to your previous maintenance dose.

**What are possible side effects from using UPTRAVI®?**
These are not all the possible side effects you may feel when taking UPTRAVI®. If you experience any side effects not listed here, contact your healthcare professional.

Like all medicines, UPTRAVI® can cause side effects. You may experience side effects during the titration period and after taking the same dose for a long time.

If you experience any of these side effects below that you cannot tolerate or do not respond to treatment, talk to your doctor. The dose you are taking may be too high for you and may need to be reduced.
• headache
• jaw pain
• aching joints
• muscle pain or a general feeling of being in pain
• diarrhoea
• feeling sick to your stomach or throwing up
• stomach ache
• reddening of the face

If you have a troublesome symptom or side effect that is not listed here or becomes bad enough to interfere with your daily activities, talk to your healthcare professional.
Reporting Side Effects

You can report any suspected side effects associated with the use of health products to Health Canada by:

- Visiting the Web page on Adverse Reaction Reporting (https://www.canada.ca/en/health-canada/services/drugs-health-products/medeffect-canada/adverse-reaction-reporting.html) for information on how to report online, by mail or by fax; or
- Calling toll-free at 1-866-234-2345.

**NOTE:** Contact your health professional if you need information about how to manage your side effects. The Canada Vigilance Program does not provide medical advice.

Storage:

- Keep out of the sight and reach of children.
- Do not use UPTRAVI® after the expiration date, which is stated on the carton and on the blister after “EXP.” The expiration date refers to the last day of that month.
- Store at room temperature (15 to 30°C). Store UPTRAVI® in its original package.
- Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to dispose of medicines you no longer require. These measures will help to protect the environment.

If you want more information about UPTRAVI®:

- Talk to your healthcare professional
- Find the full product monograph that is prepared for healthcare professionals and includes this Patient Medication Information by visiting the Health Canada website (https://health-products.canada.ca/dpd-bdpp/index-eng.jsp), the manufacturer’s website (www.janssen.com/canada) or by calling 1-800-567-3331 and 1-800-387-8781.
