Johnson & Johnson Announces European Commission Approval of Agreement to Supply 200 Million Doses of Janssen's COVID-19 Vaccine Candidate

Agreement provides option for European Union Member States to secure up to 200 million additional doses for a total of up to 400 million doses

New Brunswick, N.J., 08 OCTOBER 2020 – Johnson & Johnson (NYSE: JNJ) (the Company) today announced the European Commission (EC), acting on behalf of the European Union (EU) Member States, has approved an Advance Purchase Agreement in which the Janssen Pharmaceutical Companies will supply 200 million doses of its COVID-19 vaccine candidate to EU Member States following approval or authorisation from regulators. The EU Member States also have the option to secure up to 200 million additional doses.

"The COVID-19 pandemic continues to threaten communities worldwide and we have a responsibility to ensure access to our COVID-19 vaccine as soon as we can. We appreciate the Commission's and the Member States' support for our COVID-19 vaccine candidate and development efforts," said Paul Stoffels, M.D., Vice Chairman of the Executive Committee and Chief Scientific Officer, Johnson & Johnson.

This contract follows the conclusion of exploratory talks with the EC. The Company is in ongoing discussions with other stakeholders, including national governments and global organisations, as part of its efforts to meet its commitment to make its vaccine candidate

accessible globally, provided the vaccine has a good safety profile, is efficacious and receives approval or authorisation from regulators.

Separate to the agreement with the EC, as part of the Company's larger commitment to respond to the COVID-19 pandemic, Johnson & Johnson has also announced plans to allocate up to 500 million vaccine doses toward international efforts to ensure access for lower income countries with delivery beginning mid next year following approval or authorisation from regulators. Recognising the unique global demand for COVID-19 vaccines, we are working tirelessly to further expand the number of available doses.

Johnson & Johnson is developing and testing Janssen's COVID-19 vaccine candidate in accordance with its usual rigorous ethical standards of safety and sound scientific principles. The Company is evaluating a single dose regimen in its large-scale, pivotal, multi-country Phase 3 trial (ENSEMBLE) that started in September.¹ A second Phase 3 study with a two-dose regimen is planned to start later this year. The Company is committed to transparency and sharing information related to the Phase 3 ENSEMBLE study.¹

Janssen's investigational COVID-19 vaccine leverages Janssen's AdVac[®] technology. The same technology was used to develop Janssen's EC-approved Ebola vaccine regimen and is the basis for its HIV, RSV and Zika vaccine candidates.² To date, more than 100,000 individuals have been vaccinated with a Janssen AdVac[®]-based vaccine.³ Based on our understanding of the stability of our vaccines, we anticipate our COVID-19 vaccine candidate to be compatible with standard distribution channels without the need for new distribution infrastructure.⁴

Notice to Investors Concerning Forward-Looking Statements

This press release contains "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 regarding development of potential preventive and treatment regimens for COVID-19. The reader is cautioned not to rely on these forward-looking statements. These statements are based on current expectations of future events. If underlying assumptions prove inaccurate or known or unknown risks or uncertainties materialise, actual results could vary materially from the expectations and projections of Janssen Pharmaceuticals Inc., and/or Johnson & Johnson. Risks and uncertainties include, but are not limited to: challenges and uncertainties inherent in product research and development, including the uncertainty of clinical success and of obtaining regulatory approvals; uncertainty of commercial success; manufacturing difficulties and delays; competition, including technological advances, new products and patents attained by competitors; challenges to patents; product efficacy or safety concerns resulting in product recalls or regulatory action; changes in behaviour and spending patterns of purchasers of health care products and services; changes to applicable laws and regulations, including global health care reforms; and trends toward health care cost containment. A further list and descriptions of these risks, uncertainties and other factors can be found in Johnson & Johnson's Annual Report on Form 10-K for the fiscal year ended December 29, 2019, including in the sections captioned "Cautionary Note Regarding Forward-Looking Statements" and "Item 1A. Risk Factors," and in the company's most recently filed Quarterly Report on Form 10-Q, and the company's subsequent filings with the Securities and Exchange Commission. Copies of these filings are available online at www.sec.gov, www.jnj.com or on request from Johnson & Johnson. None of the Janssen Pharmaceutical Companies nor Johnson & Johnson undertakes to update any forward-looking statement as a result of new information or future events or developments.
